I, Khai Hee Kwan, hereby declare that the Invention titled "Method, apparatus and program to make payment in any currencies through a communication network system using prepaid cards" having US Application Service Number 09/396005 has been reduced to practice by the act of concurrently filing of an US Application and Australian Application from 17 June 1999 in the city of Sydney, Australia. Said invention is fully conceived by me prior to 30 July 1999 (Australia Eastern Standard Time). The following attached evidences are presented in support of this declaration.

- 1) One floppy disk with the following original Documents representing the submitted Invention Application comprising:

I believe the above electronic documents are reliable as Microsoft Word has historical entries and track each modification. The Examiner is invited to check the statistical properties of the said documents by using right click under properties. True copies of the above files are currently residing in a backup CD and in my hard disk.

I further declare that the remaining time was used to understand both the US and Australia application process/requirements as I wrote and apply the application by myself. Therefore, it is not unreasonable to assume the length of 1 month of more to fully complete the application for filing and to make the necessary changes to conform to the US standards later for a person with little of no knowledge of the patenting process. In addition, much time was spend in understanding how to write proper claims and as noted by the examiner in the first office action, there were many errors.

I further declared that the above statements made herein of my own knowledge are true and that all statements made on information and belief are believed to be true; and further that these statements were made with the knowledge that willful false statements and the like so made are punishable by fine or imprisonment, or both, under section 1001 of Title 18 of the United States Code, and that such willful false statements may jeopardize the validity of any application, any patent issuing thereon, or any patent to which this verified statement is directed.
